

Frontend Technology

DEVELOPMENT TEST KNOWLEDGE - CueAI RAG fixtures. Not real customer or company documentation.

The frontend technology is React with Next.js App Router for the web console. Desktop Companion uses Electron on Windows and a native companion on macOS. UI components follow the CueAI design system.

Live Session Integration

DEVELOPMENT TEST KNOWLEDGE - CueAI RAG fixtures. Not real customer or company documentation.

Live Session streams transcript questions to `/api/live/answer` which retrieves Knowledge Base context before calling the configured LLM provider. What frontend technology is used? React and Next.js.
